DATEC-KEYBOARD

The DATEC-KEYBOARD represents an almost indestructible case system for stationary data collection. The double-walled case construction provides the necessary stability for applications in rough conditions.

Flat areas for individual application and cutouts. Working without getting tired. Ergonomic design. The standard feet can be adjusted to different inclination angles (included). Holes on the bottom side of the cases allow direct mounting to a wall or machinery.

KEYBOARD HOUSINGS

These KEYBOARD HOUSINGS have been developed according to ergonomic guidelines for VDU work stations. They are flat and practical, thus permitting pleasant handling as control units.

With predetermined openings for round cables with traction discharge, flange socket and 15-channel subminiature plug. Working without getting tired. Ergonomic design. With/without deposit groove. Providing more space for additional key blocks, function keys, digital readouts.
