

Harmonious blend of materials

The new SYNERGY combines the advantages of plastic and aluminium in one single enclosure concept:

- a modern range of enclosures in 4 basic geometrical shapes – square, rectangular, circular and oval *** **iF product design award** ***
- 36 enclosure sizes, with plenty of room for the electronics and operating elements
- screw connection with stainless steel screws and Torx drive
- colour combination: Aluminium, anodised in silver / plastic parts black
- plenty of space for interfaces, no inclined surfaces, easy assembly
- recessed surface in the top part for decor foils or membrane keyboards
- bottom part with opening and screw-down cover: practical for the use of a battery compartment or for access to the interior, e.g. for a memory card or batteries that are mounted directly on the PCB; battery compartment kit, battery clips for mounting on PCBs and button cell holder as accessories
- cable outlet in the bottom part (extra-flat network cable, round cable up to \varnothing 4 mm)
- battery compartment kit, wall suspension element and extender (for increasing the height of the domes) as accessories
- individual enclosure solutions on request

Designer Statement

"The special feature of SYNERGY is its high-quality appearance. Right from the very start, the main focus of development was the quality of the materials aluminium and plastic. The timeless basic geometric shapes, the discreetly contoured and trimmed operating panels, as well as the intelligent installation technology results in enclosures that meet the aesthetic demands of your customers. And since single elements can be individually processed in length, the variety of shapes, dimensions and functional variants has created an enormous spectrum of possibilities: altogether a high-quality business."

Martin Nußberger, polyform Industrie Design

SYNERGY

Applications and Examples

- Data systems engineering
- Network technology
- Building services systems
- Safety engineering
- Medical and therapeutic applications
- Measurement and control technology
- IoT/IIoT
- Gateways
- Sensors, optoelectronics

Access control system

Battery filler for aviation batteries

CO2 traffic light

Electromagnetic impulse therapy with infrared light

Individual room control panels

Measuring system for creating metabolic profiles

Talking Thermostat

UHF RFID reader/writer

Ventilation system control

Wireless network access point

Customising Options

What do you still need for your own very personal product? We can supply enclosures and tuning knobs with all necessary modifications for fitting your electronic components. Customising options for Synergy
