

SMART-PANEL

Elegant wall-mounted enclosure for modern control units

SMART-PANEL is specifically designed for today's intelligent building control and monitoring technology. The elegant appearance fits seamlessly into modern residential, commercial and industrial environments.

- slim enclosure design in 2 sizes: square 84 x 84 mm and rectangular 155 x 84 mm
- bottom part prepared for installation on standard flush-mounted/cavity wall boxes with max. installation opening 61 mm / double flush-mounted boxes as well as larger, international installation boxes up to a max. height of 150 mm / width 61 mm
- great looking – bottom part highly polished, top part with fine surface structure
- high-quality V0 ASA+PC-FR material in traffic white (RAL 9016)
- rational, screwless enclosure assembly with snap-in function – this is a major advantage for subsequent servicing activities on site
- flat, recessed area in one end for USB and Mini-USB connectors etc. as well as for opening the enclosure by means of a separate opening tool (in pairs as accessories)
- recessed control panel protects membrane keypads, display/control elements, touch displays and much more
- The electronic components are mounted in the top part. A snap-in phenolic resin hardboard plate (accessory) protects the underlying electronics from damage during installation/service, if required
- accessory glass panel fits to top part and is designed for premium applications, e.g. for use with touch-screens, displays etc. Rear printing possible on request

Customising Options

SMART-PANEL

What do you still need for your own very personal product? We can supply enclosures and tuning knobs with all necessary modifications for fitting your electronic components.
